LB 517

some of the effort in addressing the concerns about who would have the oversight or the authority. I think it is appropriate that the Health Department and their staff, who view the water from that perspective, are involved. I think some of the concerns have been addressed. I think Senator Beutler rightly identified that this is not the last we'll see of the issue, we will revisit it and that's as it will be. But the important thing here is that we have access to the funds to be able to help the communities with their water issues, so I support it and would encourage my colleagues to do likewise. Thank you.
